

Methotrexate Closed System Transfer Device (CSTD) Kit

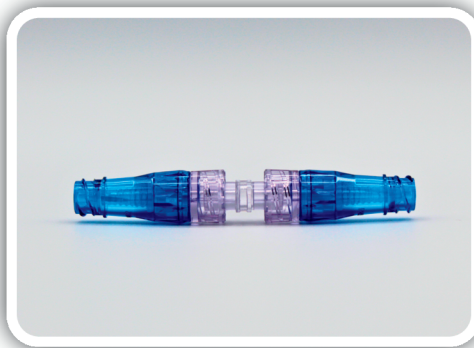

Product Overview

The STAQ Pharma Methotrexate CSTD Kit combines our ready-to-administer methotrexate with the ICU Medical closed system components to aid in safety and consistency for hazardous drug preparation. This kit helps minimize exposure risk, streamline workflow with ready-to-use components, and ensure safe delivery for both staff and patients — all in one convenient package that eliminates the need to source components separately.

Methotrexate 5 mL Syringe with
ICU Medical Spinning Spiros

ICU Medical DoubleClave
Syringe Transfer Set

5 mL Hazardous Waste Syringe
with ICU Medical Spinning Spiros
